

## Letter of Statement

Dear Customer,

Thank you for your interest and support in our battery model VC1208 under Hangzhou Vestwoods Technology Co., Ltd. We would like to make the following statement:

Based on the information provided, we have noticed that the battery VC1208 (Refer to Figure 1) does not have explicit labeling on the casing indicating it is a lithium iron phosphate battery. However, in reality, the positive electrode material of the battery is indeed lithium iron phosphate (LiFePO<sub>4</sub>).

We hereby declare that the battery VC1208 is a lithium iron phosphate battery composed of 4 lithium iron phosphate cells, each with a voltage of 3.2V. These cells are connected in series to form the complete battery (12.8V).

We sincerely apologize for any confusion or inconvenience caused by this oversight. We will enhance the labeling and documentation of our battery products to ensure accurate communication of their features and composition.

If you have any further questions or require additional information regarding the VC1208 battery or any other products, please feel free to contact us. We will be prompt in providing assistance and clarification.

Once again, we appreciate your support for our products.

Yours sincerely,

Hangzhou Vestwoods Technology Co., Ltd.
